

OBSERVATION FORM

House Municipal Schools Fall 2002 Lesson Study

As you observe the lesson pay particular attention to the following areas of student learning. Note your observations in the space provided.

1. Are the students actively engaged in the activity?
 - a. Are they thoughtfully manipulating the balls to find an accurate representation of the planets?

2. Do the students know what is being asked of them?
 - b. What is the students' level of activity?
 - c. Is each student involved in the group?
 - d. Are they confident in their sharing of results?
 - e. How to the teacher's questions help the teacher assess student understanding?

3. Do students have an understanding of the mathematics?
 - a. Can they round the numbers?
 - b. Can they order and compare the numbers?
